

1.3 OBJECTIVES

Grammar Error Handling involves two phases, namely Grammar Error Detection and Grammar Error Correction. The solution must be capable of doing these efficiently. The algorithm is expected to:

- Identify grammatical mistakes in the given input
- Correct the grammatical mistakes in the given input
- Achieve a reasonable accuracy

1.4 REPORT SUMMARY

The project report is organized as follows: the chapter 2 depicts the architecture and design of the proposed methodology, the chapter 3 details the conclusion and future work of this grammatical error correction model, and the last section provides the references.
